

Fundamentals of APA Citation

1. Demonstrate correct use of APA 7th edition formatting rules including font, spacing, margin settings, heading levels, and paragraph alignment, as required for dissertation structure.
2. Apply APA conventions for in-text citations accurately in both narrative and parenthetical formats, including treatment of multiple authors, direct quotations, paraphrasing, and secondary sources.
3. Construct a complete and correctly formatted APA reference list, using proper punctuation, capitalization, and ordering for books, journal articles, websites, and grey literature.
4. Integrate tables and figures according to APA guidelines, including correct titling, numbering, source attribution, and placement within chapters.
5. Use APA formatting consistently for special elements such as block quotations, numbers, abbreviations, and appendices in dissertation chapters.
6. Recognize ethical implications of improper citation, and apply APA citation principles to maintain academic integrity and avoid plagiarism.
7. Optionally utilize citation management tools (e.g., Zotero, Mendeley) to support citation efficiency and ensure formatting accuracy, while retaining understanding of manual APA application.

Post webinar – (Reflection Exercise – Submission on LMS) –

1. Select a 150–200 word excerpt from your dissertation work-in-progress. This can be from your introduction, literature review, or theoretical framework chapter.
2. Review and revise the excerpt to ensure all ideas that are not your own are cited correctly using APA 7th edition in-text citation format.
3. Attach the reference list (minimum three entries) for the sources you cited, formatted in proper APA 7th edition style.
4. Write a short reflection (100–150 words) answering the following:
 - a) What citation challenges did you face when reviewing your own work?
 - b) How did applying APA rules improve the clarity or credibility of your writing?
 - c) What will you do differently going forward in citing and referencing your sources?
